#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This Action is responsive to the communication filed March 7, 2006.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stumpmeier, of record.

Stumpmeier shows a modular valve system where lines A, B, F, P, and T are read as analogous to lines 14 and the lines connecting to the valves are read as analogous to lines 12. Stumpmeier includes distributor modules disposed in transverse bores 8 along the lines A, B, F etc. which can provide different connections and functions including connecting adjacent lines, any of which can be designated "dummy" components. The provision of the particular configuration recited in claim 1 is considered to be an obvious step in view of the flexibility disclosed by Stumpmeier. The use of well known components such as pressure gauges or 3/2 valves with the apparatus of Stumpmeier is considered an obvious step. The choice of a tank having a specified capacity to serve a particular installation is an obvious matter of design choice.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tarbox shows a modular valve kit with blanking plate 109 for future use of a base.
